Libraries & Frameworks React, Vue.js, Astro, Qwik, Sass, GraphQL, Node.js, Laravel, WordPress
Tools & Platforms Git, Vite, Webpack, Jest, Testing Library, Playwright, Firebase, Postman
Design Sketch App, Figma

EXPERIENCES

Present
August 2022

Instruqt | Senior Front-End Developer

- > Part of the product team to work on the Instruqt front-end app.

React Tailwind Vite Jest Testing Library Playwright

July 2022
December 2020

Rebilly | Senior Front-End Developer

- > Part of the product team to work on multiple products like Rebilly App, Framepay, and KYC.
- > Refactor the routing system of the main app to reduce the HTTP requests for each page by 50
- > Design and implement a new structure for Recommonponents (internal UI library) to support E2E tests, Vue 3, and a complete documentation system with the interactive demo and examples for each component using VuePress.
- > Implement new UX features based on analytics data and customer requests in Rebilly App.
- > Write 10+ RFCs to improve products with ideas and features.
- > Write multiple CLI and Reporting tools for the marketing, support, and documenting team. The tools were used to manage 140+ payment gateways and 100+ payment methods data and documentation missing essential tags and structures.

Vue.js Sass Vite.js webpack React Jest

YasnaTeam | Senior Front-End Developer & Designer

- > Lead Front-End team of 5 to develop Quark which is a Headless CMS to be used in projects on various scales from a simple blog to large-scale e-commerce.
- > Creating Groot which is a modular platform built on top of Vue.js to deliver a better and more consistent experience to our clients.
- > Making a full CLI for developing with Groot, which reduced the time of main actions like creating themes, serve, build, translate, and git functions by 70
- > Define and implement a new Design System for modular development of UI in the core of Groot with more than 40 components.
- > Implementing a modular system on Vue.js to minimize bundle size on builds based on specific needs.
- > Creating guidelines for Groot to make sure every new team member could sync with the platform as fast as it's possible.
- > Creating Ehda Registry project which is a platform for the organ donation organization in Iran. This platform handles the process of donating organs from a brain-dead patient to a needed one. It's a large-scale Vue.js project to handle forms with +700 fields and more than 2 million patients at the launch.
